THAA 62nd Annual Convention

Carla Hoffman (Board Secretary of THAA) and Steve Hoffman just finished attending the 62nd Annual THAA Convention. Where they completed 15 approved CE hours. While listening to many new hearing aid dispensers about the newest most innovative technology around. This exciting convention will allow our hearing specialist to provide new and improved product and product education to all our customers. Please come and visit us to get your new aids today.

Carla Hoffman joined the Hearing Aid Company of Texas in 1999. Since then, she has completed many training courses on the fitting and dispensing of hearing instruments and averages 45 hours of training per year. In addition, she has been completely trained to program many the digital hearing instruments. Currently, she serves on the Board for the Deaf and Hard of Hearing and her passion is educating our community about hearing loss.

"At 49, with years of rock and roll, guns, outboard motors, and desperately trying to hang onto my last bit of coolness, the thought of hearing instruments was out of the question. That all changed the day my buddy stopped me within a few feet of stepping on a rattlesnake. The professionals at the Hearing Aid Company of Texas used state of the art testing procedures and fit me with the latest in hearing technology. No more arguing over the TV, asking people to repeat or saying "huh?", especially in restaurants. The devices are so small that you can't even see them. I have no hesitation recommending The Hearing Aid Company of Texas. My only regret is I waited so long."

-Chuck Galbraith

Hearing Loss? Take this simple test

- Find you are continually asking people to repeat words or phrases, though they feel they're speaking loud enough?
- Prefer the TV or radio louder than others do?
- Have difficulty understanding conversation within a group of people?
- Avoid group meetings, social occasions, public facilities, or family gatherings where listening may be difficult?
- Have trouble hearing at the movies, house of worship, concert halls, or at other public gatherings—especially where sound sources are at a distance?

If you answered 'Yes' to at least two of these questions, you may have a hearing loss and need to have your hearing tested. Call or [email](#) the Hearing Aid Company of Texas today to schedule your no cost hearing evaluation and consultation! (361) 814-3487

LUNCH -N- LEARN

Come join us for our lunch –N– learn event. The first Monday of every month. Carla Hoffman-BC-HIS hosts this wonderful event and provides the latest in technology updates and will answer any and all questions you may have about our newest hearing aids. Please call and RSVP today!!
